

# Photocatalytic Deodorant and antimicrobial Nano Spray

## Long Lifetime Self Clean by sunlight

**Coating Coverage**  
Manual : 30 mL/ m2 (sqm)

The product, mainly composed of photocatalytic nano TiO<sub>2</sub> particles, and de-ionized water, is designed for car interior long term anti-fouling application. Under sunlight condition, it not only can effectively decompose odor, smoke smell, and VOC (Volatile Organic Compounds) such as Formaldehyde (CH<sub>2</sub>O), Acetaldehyde (CH<sub>3</sub>CHO) and other organic gas into non-harmful substances but also inhibit microbes (bacteria, viruses, and fungi) to prevent surface as a medium of transmission of infection. After spray it on the car interior surface, it can create an invisible nano film (thinness around 10 nanometer), which can automatically purify car interior air under sunlight condition.

**Main Features**

- Anti-bacteria, Anti-viruses, Anti-Fungi
- Decompose odor, smell, and VOC
- Decompose organic stains on the surface
- Prevent surface as a medium of transmission of infection
- Longer term antimicrobial and deodorant effect
- Green and Eco friendly

**Coating Method :**  
Manual :By wetting Surface (Spraying)

**Coating Methods**  
Spray it on the surface of absorbent materials and let it dry.  
It can perform photo-catalytic function under sunlight

**Main Application**  
Spray it on the surface of absorbent materials and let it dry. It can perform photo-catalytic function under sunlight.
