Hydrophobic Nano Coating for Car Glass Invisible Wiper

The product is made by a new generation of Nano SiO₂ and special chemical formulation to provide car glass hydrophobic, oleophobic, and non-stick (easy clean) properties. Driving in the rain, it can keep windshield fairly clean and highly increase visibility and driving safety. Due to having solid chemical bonding with glass substrate and a special nano grade surface structure, the coating is highly durable and invisible. Moreover, it can withstand abrasion resistance, chemical resistance, high temperature resistance, and UV radiation resistance.

STEP 1 Clean glass and Spray the product evenly on cleaned glass

STEP 2 Wait for 5-10 minutes (agent close to dry)

STEP 3 Apply microfiber or linen to polish surface softly with circular motion After 24 hours, the coating completely hardened and can be used and tested

Main Features

- Hydrophobic and oleophobic properties
- Strong non-stick property – Easy clean and save cleaning time.
- Protect car painting from environmental corrosion, abrasion, and pollution
- High transparency and no influence on the appearance of car painting
- Chemical resistance (up to pH-value of 13)
- Abrasion resistance
- High Temperature resistance
- Easy coat and re-coat (Hardening at room temperature. No additional energy or UV light required)
- Highly durability – up to 2 years in most conditions
- Green and Eco

Main Application

- Rearview Mirror
- Window
- windshield
- Rearview Mirror.
